

MODERN WORKPLACE WITH SECURE SCORE: IMPROVE SECURITY AT-A-GLANCE

With every passing year, the cyber threat environment becomes more and more treacherous.

Just look at the numbers:

- **\$13 Million:** The average cost of cybercrime in 2018¹
- **\$5.2 Trillion:** The total value of assets at risk if security investments are not made¹
- **91%:** The percentage of security breaches that originate from phishing or spear-phishing attacks²
- **1 in 4:** The number of business that file for bankruptcy after a cyberattack³

Plus, with more employees going remote, these problems are only going to be amplified as IT teams work to ensure access to necessary programs, all while maintaining the right security posture for your business.

But there is a way to alleviate this pressure on your IT teams – try the Modern Workplace with Secure Score.

EXPERIENCE THE DIFFERENCE

Modern Workplace with Secure Score

Modern Workplace with Secure Score helps improve security posture and performance by helping to identify security risks with the Office 365 (O365) environment and recommendations to mitigate potential risks.

With it, you can:

- Create a secure baseline within your Office 365 environment
- Flexible multi-factor authentication (MFA) enforcement based on user needs.

- Easily assess your current security posture and prioritize resources with a score-based framework.
- Establish plans and take remediation steps to improve your security position and track performance.
- Protect users and sensitive data with Data Loss Prevention and Advanced Threat Protection policies
- Gain visibility, insights and guidance to manage your cloud security from a single pain of glass.

Now more than ever, it's important to provide additional securities to protect your employees from cyberattacks. Together, we can help enhance your security posture and baseline for O365 environments through this solution.
